

# Crystal Soft

Direct flow filter with saltless ion exchange module and carbon post-treatment.

## Key Benefits:

- Efficiently removes Ca and Mg bicarbonates, preventing scale build-up on hot beverage equipment.
- Low maintenance costs—up to 30% lower than comparable models.
- Flowmeter with a screen to keep timely maintenance & protect equipment

## Delivery set:

- |  |        |
|--|--------|
| • Filter housing                               | 1 pc.  |
| • Ion-exchange resin module AQUAPHOR KHC       | 2 pcs. |
| • Carbon post-treatment module AQUAPHOR K2     | 1 pc.  |
| • Flowmeter with a screen                      | 1 pc.  |
| • Bypass line for regulation of mineralization | 1 pc.  |
| • Set of connection tubes                      | 1 pc.  |

|                                |            |
|--------------------------------|------------|
| Permeate capacity, liters/hour | 120        |
| Module resin capacity*         | 3000L      |
| Bypass line                    | ✓          |
| Dimensions (LXWXH), mm         | 265X90X360 |
| Weight, kg                     | 3,5        |

\* May vary. Depends on the actual inlet water quality and bypass mixing ratio
